

Check Replication Slots

Last updated by | Lisa Liu | Nov 6, 2020 at 10:35 AM PST

Use the following Query to check the replication slots:

```
MonDmPgsQLReplicationStatsPrimary
| where LogicalServerName == "db-unicredit-stage"
| project LogicalServerName, pid, slot_name, slot_type, active, application_name, wal_sender_state, restart_lsn, backend_start, PreciseTimeStamp, backend_xmin, total_lag_in_bytes, sync_stat
| order by PreciseTimeStamp desc
```
