Issue

Release pipeline failing with the following error:

Exception: 2020-08-26T15:37:07.9469179Z ##[debug]Microsoft.Rest.SerializationException: Unable to deserialize the response. ---> Newtonsoft.Json.JsonReaderException: Error reading integer. Unexpected token: StartObject. Path '**typeProperties.waitTimeInSeconds**', line 1, position 23679. 2020-08-26T15:37:07.9503000Z ##[debug] at Newtonsoft.Json.JsonReader.ReadAsInt32

Resolution

This issue was due to the Azure SDK/Powershell being out of date. Make sure that these are updated to the latest version. *waitTimeInSeconds* only allowed integers until June but was updated to support expressions at that time.
