## 201070 [Sql] String or binary data would be truncated

Monday, August 5, 2019  
5:05 PM

SME	
Symptoms	The customer may see below error message when copying data into Sql sink(onPrem/Azure) message': 'ErrorCode=FailedDbOperation,'Type=Microsoft.DataTransfer.Common.Shared.HybridDeliveryExcepti database operation failed with the following error: &apos;String or binary data would be truncated.\\ statement has been terminated.
Cause	Cx's Sql table schema definition has one or more columns with less length than expectation.
Resolution	<div>1. Apply fault tolerance <a href="https://docs.microsoft.com/en-us/azure/data-factory/cop-fault-tolerance">https://docs.microsoft.com/en-us/azure/data-factory/cop-fault-tolerance</a>, especially "redirectIncompatibleRowSettings" to capture whic having issue. 2. Double check the redirected data with the Sql table schema column length to u which column(s) need to be update 3. Update table schema accordingly</div>
More Information	

Created with Microsoft OneNote 2016.
