	201014- [Sybase]Customers ask for connection additional properties		ASC Onboard	N/A

Monday, March 18, 2019
5:02 PM

SME	
Symptoms	The customer cannot specify connection additional properties, ex. port and connectionTimeout.
Cause	Sybase Linked Service is not based on connection string, and only support to specify basic properties - server, database, username, password and authenticationtype.
Resolution	1. Suggest the customer to use Odbc connector instead. https://docs.microsoft.com/en-us/azure/data-factory/connector-odbc 2. [Recommended] Notify production team to backlog the customer asks for further improvement on Sybase connector.
More Information	
Tags	Sybase, connection properties
