

Last updated by | Vimal Sharma | Jan 5, 2022 at 7:44 AM PST

```
cluster('adfcus').database('AzureDataFactory').AdfTraceEvent | union cluster('adfneu').database('AzureDataFact
| where env_time >= ago(5d) and ComponentId == "PipelineManager"
| where TraceCorrelationId == "<PipelineRunId>"
| where Message has "DependencyStatus: "
| project env_time, env_cloud_name, env_cloud_role, env_cloud_deploymentUnit, ComponentId, Message, TraceCorrel
| sort by env_time asc
```

NOTE: If you don't have the pipelineRunId, you can fetch it using the TriggerId as per this [TSG](#).

In our case, we found that the actual trigger failed to execute from the AdfTraceEvent causing dependent triggers to be stuck:

env_time: 2020-07-31 09:11:24.540

env_cloud_name: PMEastus

env_cloud_role: PipelineManager.PipelineWebRole

env_cloud_deploymentUnit: adfpipelinemanager

ComponentId: PipelineManager

Message:

TumblingWindowTriggerHandler.IsTriggerRunReadyToStartAsync[598]: triggerId:

08586060250159236497692960660CU76 Is TriggerRun ready to start: False , DependencyStatus: { "(7/17/2020 5:01:00 PM, 7/17/2020 5:11:00 PM)": { "<TumblingWindowTriggerName>": "**Failed**" } }.

Resolution

With the new [updates](#) to the Tumbling Window Trigger run, customers can cancel or rerun the Tumbling Window Trigger Runs:

Cancel and Rerun Tumbling Window Trigger Run : <https://techcommunity.microsoft.com/t5/azure-data-factory/cancel-and-rerun-tumbling-window-trigger-run/ba-p/1815699>

Cancel Tumbling window run: <https://docs.microsoft.com/en-us/azure/data-factory/how-to-create-tumbling-window-trigger#cancel-tumbling-window-run>
