Issue

Snapshot generated successfully, but apparently not being delivered. When looking into the distribution agent the following message can be seen: *The concurrent snapshot for publication '<publication_name>' is not available because it has not been fully generated or the Log Reader Agent is not running to activate it. If generation of the concurrent snapshot was interrupted, the Snapshot Agent for...*

Investigation/Analysis

Log reader agent is running. Connectivity exists between the two instances

Mitigation

Drop and recreating subscriber solved the issue - possible misconfiguration with the initial setup of the subscriber.
