SME	
Symptoms	Customer copy to/from CosmosDB, but get error message like: "Entity with the specified id does not exist in system"
Cause	<ul style="list-style-type: none">Specified Collection does not exist in systemOr there is something wrong with the CosmosDB account
Resolution	<p>Please try below tool to see if the collection is indeed accessible: https://docs.microsoft.com/en-us/azure/cosmos-db/import-data</p> <div><p>The screenshot shows the 'DocumentDB Data Migration Tool' window. On the left is a sidebar with 'Target Information' selected. The main area is titled 'Specify target information' and contains fields for 'Export to:' (set to 'DocumentDB - Sequential record import (partitioned collection)'), 'Connection String' (with a placeholder and a 'Verify' button), 'Collection' (set to 'employees[1-4]'), 'Partition Key' (set to 'fullName'), 'Collection Throughput' (set to '1000'), and 'Id Field' (set to 'empid'). There is also an 'Advanced Options' section which is currently collapsed. At the bottom are 'Previous' and 'Next' buttons.</p></div> <p>If customer cannot load data from/to collection with this tool, please</p> <ol style="list-style-type: none">1. Ask customer to create the collection or2. Create ticket to cosmosDB team if customer confirm collection has been created <p>If customer can load data from/to collection with this tool, please contact ADMS.</p>
