

Find who dropped the Database

Last updated by | Vitor Tomaz | Jun 8, 2022 at 5:31 AM PDT

One of the common questions that is asked when a database is dropped is who did it/when did it happen.

The customer should be able to self-serve for that type of investigation using the Audit Logs.

See the following Blog for more details: <https://techcommunity.microsoft.com/t5/azure-database-support-blog/learning-from-expertise-2-who-dropped-my-azure-sql-db/ba-p/2149276> 

Note:- Due to privacy and security regulations (GDPR) we should not share any information related to IP or user to the customer, but we can help the customers find this information themselves.
