# FAIL_FAST_FATAL_APP_EXIT within Microsoft.DataTransfer.Execution.HDInsightExecutors.dll

Last updated by | Ranjith Katukojwala | Mar 7, 2023 at 11:35 AM PST

Trouble shooting steps:

1. Visit https://azurewatson.cloudapp.net/ ⧉

2. Search HDInsightExecutors in bucket string

3. Found matching record with the timestamp from icm

4. By default, the report only contains native stack, to get the .NET stack, click the **windbg**, and wait for session to establish (upto 5 minutes)

5. Issue command as below to get .NET stack

```
> !clrstack
