Capture HDInsight Activity Logs
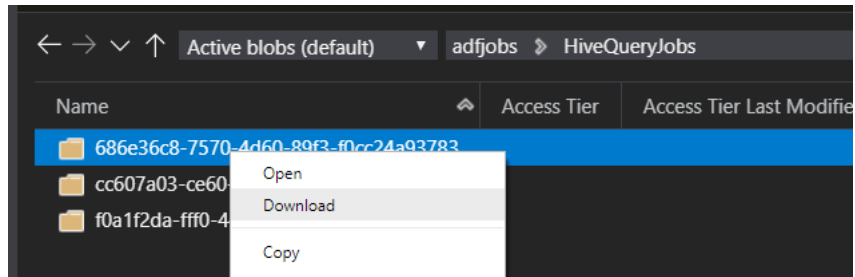

Monday, March 16, 2020
10:03 AM

If you're troubleshooting HDInsight Activity failures, please ensure to attach the **stdout** and **stderr** logs of your application from the **adfjobs** container in the Azure Storage L
Service.

Browse to the folder corresponding to the Activity RunId:

Download the contents of the folder and attach it to the ICM for review:

Created with Microsoft OneNote 2016.

How good have you found this content?
