201082- [SAP Table/SAP Open Hub]Check Customer's SAP Version supported or not

Thursday, November 7, 2019
10:23

SME	
Symptoms	On SAP Table/SAP Open Hub Connector document, we stated that the version of products in Business Suites(including SAP ECC, SAP BW) need to be higher than 7.0.1 There are some questions coming such as whether SAP ECC EHP6 is supported or not.

Resolution	What we care about most is the netweaver version which is not strongly bind with the SAP ECC EHP version. SAP ECC 6.0 EHP 7 generally has the NETWeaver version >=7.4. Generally SAP related guys should be quite familiar with their version number starting with "7.x"
	
	Here are the steps to confirm the NetWeaver version in case you need to know more clearly about how to get that
	      1. Use SAP GUI to connect to the SAP System
	      2. Go to System -> Status
	      3. Then you will see the release of the SAP_BASIS, ensure it is larger than 701.
