## Issue

You notice the following error while calling HDInsight Activity:

```
Failed to read or parse the storage connection sting. Error: System.ArgumentNullException: Value cannot be nul

Parameter name: connectionString

    at Microsoft.WindowsAzure.Storage.CloudStorageAccount.Parse(String connectionString)

    at Microsoft.DataTransfer.Execution.HDInsightExecutors.HdiStorageParameters..ctor(String connectionString,

    at Microsoft.DataTransfer.Execution.HDInsightExecutors.BlobsHdiStorage..ctor(IDictionary`2 hdiStorageLinked
```

## Resolution

Switch to use Account Name/Account Key, and "connectionString" should be present in Storage LinkedService
