Issue

Data preview failing with the following error:

Error at Source 'SRCProduct': HEAD https://xxxsadls.dfs.core.windows.net/inbound//?action=getAccessControl&timeout=90 ⬀ StatusCode=403 StatusDescription=This request is not authorized to perform this operation. ErrorCode= ErrorMessage=

Resolution

Few pre-checks to be performed:

- Check if the permissions to the Managed Identity/Service Principal is assigned properly on the ADLS Gen2 storage to run the dataflow.

- Check if you can preview the data in the dataset, and the issue is only with dataflow preview.

- Checked the Linked Service configuration. In this case, customer was using Managed VNet to access ADLS Gen2 store:

Resolution

Customer was using a regular IR to access Managed VNET resource. Asked customer to create use a Managed VNet IR for his debug session.
