<LogProperties><Text>Invoke callback url with req: {"Status":2,"IsUpdateQueuedStatus":false,"Output":null,"Error":{"ErrorCode":**2504**,"Message":"**Operation returned an invalid status code 'Conflict'**","Details":null}}</Text></LogProperties>

Cause

The job was marked as completed, so new tasks submission failed with 409.

Resolution

The job under the batch account that is used to submit ADF jobs had a completed status, deleting the job and rerunning the pipeline fixed the Conflict issue.
