Query Performance Insight

Last updated by | Radhika Shah | May 31, 2022 at 7:02 AM PDT

At this moment Query Performance Insight doesn't support SQL Database Managed Instance and we don't have any date to share with customers of when it will be available.

We have other options depending on what you want to do:

Azure SQL Analytics

Azure SQL Analytics for monitoring Managed Instance performance, with automated troubleshooting based on AI: https://docs.microsoft.com/en-us/azure/azure-monitor/insights/azure-sql

Short demo video: https://youtu.be/ESBxcoR3DyA

https://github.com/JocaPC/qpi is a library that Jovan Popovic wrote to track performance of workloads in MI using TSQL
