Issue

You can see an ASC Insights about *Managed Instance cannot be deleted due to locked resources* or any other way of detecting Scope Locked related issues and want to confirm the lock still exists and its kind.

Investigation/Analysis

Using Jarvis Actions

Open Jarvis Actions and navigate to **Azure Resource Manager > Resource Group Management > Get resources from provider**

The URI is like: **/subscriptions/<subId>/providers/Microsoft.Authorization/locks**
and API version can be **api-version=2016-09-01**

Mitigation

Customer should remove the lock.

Public Doc Reference

See *Locks on virtual network* at https://docs.microsoft.com/en-us/azure/azure-sql/managed-instance/connectivity-architecture-overview#network-requirements

Keywords: Locks ; ScopeLock ; Locked scope ; ARM lock ; Resource Locks ;
