Configure minimal TLS version

Last updated by | Vitor Tomaz | Jun 8, 2022 at 5:36 AM PDT

Contents

Issue

Configure and troubleshoot minimal TLS version

Investigation/Analysis

Minimal TLS version set for the instance can be seen in ASC Resource Explorer (RE). Navigate to the managed instance resource in RE, select Properties tab and find "Minimal TLS version".

To understand when connection type was changed, check Management Operations under Provisioning tab.
