Summary

Very few properties are allowed to change on application versions for update. The following are allowable changes:

- Target regions
- Replica count
- The expiry/signature of the sas url

Possible causes for issues

If any other properties are changed, this will generate an error.

1.Cannot update version

Error

Cannot update version

Error that customer sees:

```
ErrorMessage: Changing property 'galleryApplicationVersion.properties.publishingProfile.manageActions.insta
 ErrorTarget: galleryApplicationVersion.properties.publishingProfile.manageActions.install
 StatusCode: 400
 ReasonPhrase: Bad Request
```

Mitigation

Confirm that the property is not being changed.
