Could not find Register button to register a Self-hosted
Integration Runtime

Thursday, November 2, 2017

SME	Lili Geng (ligeng)
Symptoms	Customer could not find Register button on Configure UI to register a self-hosted IR
Cause	From Oct. (Integration Runtime 3.0)Release, we want to give customer a clean and secure integration runtime node by removing the register button on an existing nodes. when a node has been registered to some Integration Runtime whether it's online or not, if customer want to re-register it to another Integration Runtime, customer must uninstall the previous node, install and register the node.
Resolution	• Go to control panel to uninstall the existing Integration Runtime, **Do not keep data** during uninstall process(this is important**(Click Yes)**) • If you don't have the Integration runtime installer MSI, Go to download center (https://www.microsoft.com/en-sg/download/details.aspx?id=39717) to download latest Integration Runtime • Install the MSI & Register

Created with Microsoft OneNote 2016.
