Issue Summary :

LTR backups not showing in the portal under the Available backups screen.

Language specific issue:

This appears to be a bug related to the language used. For my customer, they were using Portuguese. If they used English, the backups showed up in this screen. Here's the link to track the bug

http://sqlbuvsts01:8080/Main/SQL%20Server/_workitems#_a=edit&id=12212274

German language also affected (had a case for Black Forest with the same symptoms)

Mitigation/Workaround:

Have customer change the Portal language to English

Classification

Root Cause: Azure SQL DB v2\Backup/Restore\Service Issue\RestoreFail\LTR\Other
