Issue

Customer wanted to be able to break the foreach loop when an inner activity fails. There is no break functionality in foreach.

Resolution

Video recording demonstrates below activities and how to accomplish break loop functionality with below set of activities already available in ADF.

- how to populate array type of variable
- Expression evaluation in until
- time out to abort(avoid infinite loop)
- Accomplish functionality of incrementing(cannot increment in counter++ fashion)
- Set variable
- append variable functionality for
