202003- Copy activity terminated

Friday, December 14, 2018
6:01 PM

SME	
Symptoms	The copy activity run was terminated due to execution stuck on retrieving data. Please double check your data sources' availability and retry. If the issue persists, contact support for help.
Cause	If our monitoring system detects that the copy activity is stuck and it will not be able to recover, then we will use management tool to terminate the activity.
Resolution	If there is retry set on pipeline level, the activity will be rerun automatically. If not, customer could just rerun the activity. And further, customer should also check it's data source's (both source and sink) work load, try to schedule activity runs to different time window to avoid concurrent load to data sources.
