The current operation could not be completed because the database is not provisioned for sync or you not have permissions to the sync configuration tables.	
The runtime encountered an error when attempting to provision scope '0167D06D-F7BA-4199-B296-5BEE3A8EEE69'. This error can be thrown if another scope is also being provisioned at the same time or someone is attempting to synchronize a scope that is currently being provisioned. For SQL Azure, Create Structure Draft Closed; please de-provision this scope and attempt to provision again. For SQL Server or SQL Compact, Create Structure Draft Closed; all provisioning changes will be rolled back and it is only necessary to restart provisioning. Only one scope can be provisioned at a time.
