Issue

If you notice the following error while executing the HDInsight Activity:

The decryptor is null, please check the compute type and make sure linked service run on right compute

Investigation

The previous log has entry: "The value of the parameter is AKV: baseUrl: https://<yourKeyVaultName>.vault.azure.net"

Resolution

This is caused by configuration issue, please follow this doc: https://docs.microsoft.com/en-us/azure/data-factory/store-credentials-in-key-vault ⧉

The key vault:**yourKeyVaultName** must give DataFactory access
