Sharing tab not display

| Sometimes customers can have this situation that they used to use a IR as self-hosted IR, but then they cannot find the sharing tab.

- Firstly, what they previously used is a `self-hosted IR` which has `sharing tab`, but now what they are using is `linked IR` which doesn't have `sharing tab`. That's why they cannot see the `sharing tab` right now.
- The reason for causing this change can be that customers use different mode. Say prevously customers used live mode where this IR is `sefl-hosted IR`, while now they are using git mode where this IR is `linked IR`.

To sum up, customers' config in git mode is different from live mode, which can cause this problem.
