How to subscribe to Azure Portal Alerts

Last updated by | Lisa Liu | Nov 6, 2020 at 10:34 AM PST

To receive planned maintenance notification

1. In the portal, select **Service Health**.
2. In the **Alerts** section, select **Health alerts**.
3. Select **+ Add service health alert** and fill in the fields.
4. Fill out the required fields.
5. Choose the **Event type**, select **Planned maintenance** or **Select all**
6. In **Action groups** define how you would like to receive the alert (get an email, trigger a logic app etc.)
7. Ensure Enable rule upon creation is set to Yes.
8. Select **Create alert rule** to complete your alert

For detailed steps on how to create **service health alerts**, refer to <u>Create activity log alerts on service notifications</u>.
