- Query
- Result

We can use below query to check how much time to took for a cluster to acquire compute.

Query

```
let activityId = 'XXXXXXXXXXXXXXXXXXXXXX';
cluster('adfcus.kusto.windows.net').database('AzureDataFactory').GetDataflowComputeAquisitionTime(activityId)
```

Result

ActivityRunId	Timestamp	computeAcquisitionTimeInMS	computeAcquisitionTimeInSeconds
86061d31-60a6-4b39-8345-8066ff155ae9	2021-02-08 07:23:59.7800	17848	17
