[SSIS IR] How to check IR definition
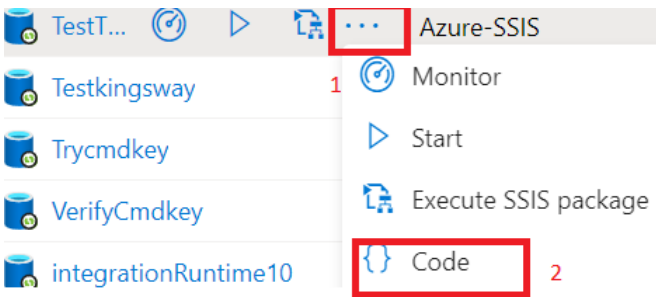

Last updated by | Wanli Mao | Jun 22, 2022 at 1:54 AM PDT

1. For any IR you want to check IR defition: click on ellipsis and then code

2. Then you can get IR definition

```
1   {
2       "name": "TestCustomSetup",
3       "properties": {
4           "type": "Managed",
5           "description": "standard custom setup",
6           "typeProperties": {
7               "computeProperties": {
8                   "location": "East US",
9                   "nodeSize": "Standard_D2_v3",
10                  "numberOfNodes": 1,
11                  "maxParallelExecutionsPerNode": 1
12              },
13              "ssisProperties": {
14                  "customSetupScriptProperties": {
15                      "blobContainerUri": "https://expressirwanaotest.blob.core.windows.net/oracleclient",
16                      "sasToken": {
17                          "type": "SecureString",
18                          "value": "**********"
19                      }
20                  },
21                  "edition": "Standard",
22                  "licenseType": "LicenseIncluded"
23              }
24          }
25      }
26  }
```
