[Oracle]Oracle source only accepts single statement

Last updated by | Jackie Huang | Jan 4, 2022 at 12:24 AM PST

Contents

- Symptom
- Error
- By design

Symptom

Step 1:

A simple copy activity from Oracle (Source) to Azure DB with a date in where clause. Pipeline runs successfully.

Successful run-

Step 2:

customer replaced the date in the where clause with a bind variable as below and the pipeline fails with error '' w ith multi-statements.

Failure-

Same query runs successfully when customer runs from SQLDeveloper.

Error

If customer inputs several statement from Query tab, such as below:

Var exec Select **** from

ADF may generate the error:

errorCode: 2200

invalid SQL statement

By design

The query in Oracle source only accepts single statement.
