Managed Airflow Limitations

Scope of Support and Limitations:

```
- Issue with Airflow IR creations and Importing Airflow Dags from storage account to airflow environment.
- Dag executing locally for customers and not in Airflow IR environment
- Airflow availability in other regions will be available in Q2 2023.
- Data Sources connecting through airflow should be publicly accessible. Private VNet will be in implementatio
- Airflow supports Blob Storage officially but also allows to use of ADLS with some limitations.
- KV is not supported in LinkedServices to import dags
```

◀ ▬▬▬▬▬▬▬▬▬▬▬▬▬▬▬▬▬▬▬▬ ▶

Out of Scope:

```
- Failing dag execution is not CSS scope.
- Anything inside Airflow UI is not in scope except dags executing locally for customers and not in the Airflo
```
