Contents

Issue

Database state is shown as Unknown in Portal.

Investigation/Analysis

Database has an empty space and the end, so the database name is really "sth_archive ". Solution should be either:

1. Provisioning trim database name before sending the request.
2. ARM should reject provisioning request with tailing white space

Mitigation

The standard mitigation for a trailing space is as follows: ALTER DATABASE [DB] MODIFY NAME = [DB_] ALTER DATABASE [DB_] MODIFY NAME = [DB]
