Failover Groups Limitations

Last updated by | Vitor Tomaz | Aug 5, 2020 at 12:41 PM PDT

Current Lmitations (April 2020)

Contents

- Current Lmitations (April 2020)
    - Be aware of the these limitations:

Be aware of the these limitations:

1. Failover group cannot be created between two servers or instances in the same Azure regions.
2. Failover group cannot be renamed. You will need to delete the group and re-create it with a different name.
3. Database rename is not supported for instances in failover group. You will need to temporarily delete failover group to be able to rename a database.
