### 201064 - [SAP ECC]Filters do not take effect		**ASC Onboard**
Monday, July 22, 2019 06:55		

SME	
Symptoms	**Customer wants to read data from SAP ECC while finding that the filters set in the Query did not work**
Cause	This is because SAP ECC connector integrated with the Odata endpoint exposed by customers' SAP Gateway. For specific logics that can be supported via their SAP ECC Odata endpoints, there are custom logic needs to be added on customer's SAP Gateway via ABAP code.
Resolution	Customer needs to update their Odata endpoint on their SAP gateway, Here are some reference links: 1. https://blogs.sap.com/2013/06/20/how-to-develop-query-options-for-an-odata-service-using-code-based-implementation/ 2. https://blogs.sap.com/2011/11/04/odata-channel-api-implementing-paging-of-entity-sets/
