Contents

Issue

HDI activity with BYOC HDInsight LinkedService run Failed with error message

"*Unable to access container adfjobs in account *.blob.core.windows.net using anonymous credentials*"

Cause

linkedServiceName : Name of the Azure Storage linked service that refers to the Azure blob storage used by the HDInsight cluster.

```
{
    "name": "HDInsightLinkedService",
    "properties": {
        "type": "HDInsight",
        "typeProperties": {
            "clusterUri": " https://<hdinsightclustername>.azurehdinsight.net/",
            "userName": "admin",
            "password": "<password>",
            "linkedServiceName": "MyHDInsightStoragelinkedService"
        }
    }
}
```

From https://docs.microsoft.com/en-us/azure/data-factory/v1/data-factory-compute-linked-services ↗

If the storage is not the Azure blob which can be associated with the cluster. It will hit the error "Unable to access container adfjobs in account *.blob.core.windows.net using anonymous credentials" when run the pipeline

Resolution

Change the connection string in storage linked service to the one which cluster is really using, as primary or additional storages.
