Checking Autovacuum

Our Product Group engineers have developed new workbooks for the Azure database for PostgreSQL flexible server that will aid the support engineers in resolving a variety of customer issues:

- High CPU.
- High Memory.
- High IOPs.
- Autovacuum/vacuum monitoring.
- Autovacuum blockers and Wraparound identification.
- High temporary file usage.

Use the below workbooks to check the autovacuum:

Workbook Name	Link
Autovacuum/vacuum monitoring	[Autovacuum/vacuum monitoring](#)
Autovacuum blockers and Wraparound identification	[Autovacuum blockers and Wraparound identification](#)
