The official tune for validating connectivity of DataFactory linkedService/Dataset is to USE ADFv2 Portal as the primary.

While on selfhosted IR UI, similar functionality is still provided as a detailed component level check on customized drivers which are brought in by customer themselves

Since Self-Hosted Integration Runtime release V3.3,

All blank fields to be filled is in JSon format, and special chars need to be escaped

Previous CRI 56018884

Created with Microsoft OneNote 2016.
